SYSTEM OVERVIEW

**Simply Modular.
Surprisingly Complete.**
Life is complicated. Your sign system shouldn't be. Arris offers well-designed, **proven solutions** for all type of interior signs, but does so without being overwhelming.

The Arris system is simple to understand, with low-profile, extruded aluminum frames and clearly defined sizes and options. At the same time, Arris packs a powerful punch, offering a virtually limitless range of custom sizes and flexibility to suit your project's specific needs. And, frames are designed to accommodate a wide range of display materials and graphics solutions, so design options are limited only by imagination.

DRESS IT UP WITH ACCENTS!

.040" Aluminum Connector with Pre-Applied Adhesive Attaches Securely to the Back Side of a Standard Arris Frame.

Compatible Arris Frame Widths:
(4", 6", 8.5" & 11")

1/8" Thick Acrylic or Wood Laminate Accent Shape Attaches to the Alumimum Connector, Flush with the Top (and / or Bottom) of the Arris Frame.

The Finished Arris Accents Assembly Represents the Easiest and Most Cost-Effective Way to Incorporate Decorative Shapes into Your Signage Design
Colors:

Cherry Birch   Cocoa Maple   Amber Maple   Clear Acrylic
(for Painting by Sign Trade Customer)

Shapes:

BLADE   ARCH   WAVE   BOX   BOX BASE

ACCENTS
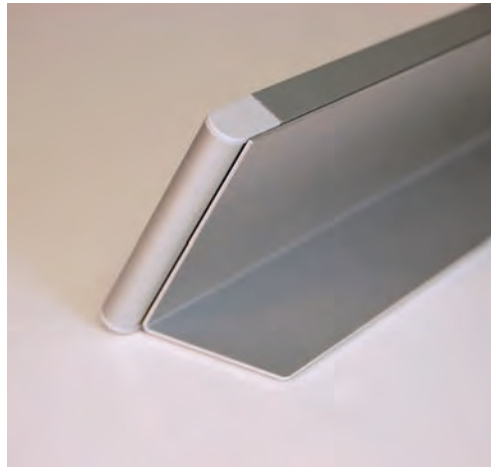

Shape up your next project with **Arris Accents**, the easiest and most cost-effective way to incorporate decorative backers into your signage design.Offered in a range of shapes and sizes with virtually limitless possibilites, **Accents** provide a unique touch for your sign system to coordinate with a facility's interior or corporate brand.

Note: Accents is not compatible with M-Series.

DESK SIGNS

Arris Desk Signs are an ideal solution for personnel identification, point-of-purchase displays, corporate reception area announcements and more. A formed anodized aluminum stand is attached to the back of the Arris frame positioning the sign at an ideal desktop and countertop viewing angle.

WORKSTATION SIGNS

Arris System offers a unique yet easy attachment option for workstation signs. An Aluminum Panel Clip is precision formed to custom specifications and attached to an Arris system holder. Because Arris clips are custom formed, they are compatible with virtually any workstation.

SP SERIES SIGNS

The Arris Single-Profile (SP) Series is an extremely cost-effective option for small personnel or room number signs. SP signs feature a 1/4" depth single aluminum extrusion frame which is compatible with a lift-up / pull-out .040" to .060" thick insert.

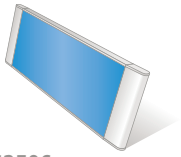

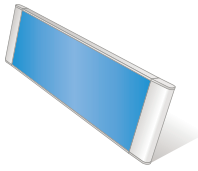

M-SERIES SIGNS

Aesthetically compatible with the vast Arris Standard Assembly range, the 4" & 6" M-Series with injection molded caps is available in the sizes and configurations shown on page 4. Custom Heights also available.

**Note:** M-Series is not compatible with Accents.

Wall Mount

WALL SIGNS

Large Sizes
(11"+ Widths)

Arris System Large Assembly wall mounted frames come standard with an 1/8" thick non-glare acrylic lens as described below but the frames are compatible with essentially any 1/8" thick rigid display material, including photopolymer, metallic or other laminates, engraved plaques and more.

Large Assembly LA

Arris System Large Assembly signs, feature radius aluminum profiles at the Top and Bottom of the frame. Overall depth of the signs is 11/16". Mounting is via concealed mechanical fasteners only.

Add to the insert size 2-1/4" for overall width and 3/16" for overall height.

"ARRIS Sign System is a homerun with my clients, and ARRIS support is excellent!"

Greg Smith
Graphics Systems
Annapolis, MD

"We have used Arris Sign Systems for many projects throughout our company and have had nothing but great response from Arris as far as delivery and quality products, always on time and within budget, I would recommend them to anyone who is looking for quality interior wayfinding signage.

Edge *Large Format Display System*

From oversized wayfinding maps and building directories to large display needs for educational, transportation and retail facilities, Arris Edge is the perfect solution.

Arris Edge is not a "snap-frame" system like other large, low-profile displays on the market. Edge is a well engineered, tamper-resistant display system for when durability, security, and image matter.

DIRECTORIES

Arris System Directories feature subsurface, removable cartridges of extruded aluminum bands that can accommodate individual laser printed paper message strips. With individual strip capabilities, Arris directories are easy and economical for clients to maintain in-house, without having to replace full digitally printed displays.

Large Assembly LA

Arris System directories are constructed as Arris Large Assembly signs, with the radius aluminum profiles at the Top and Bottom of the frame. Overall depth of the signs is 11/16" and the directory strip cartridges are protected by a lift-out 1/8" thick acrylic lens. Mounting is via concealed mechanical fasteners only.

Arris System **Header Directories** feature a modular, 1/8" thick x 4"h acrylic header band. The header band is separated from the directory strips by a 1" aluminum divider profile. Non-glare acrylic headers are ideal for sub-surface silkscreen printing, applied vinyl graphics or may be used as a protective lens for digital prints.

"We have been using Arris Sign Systems products since 2011. We order their products because of their contemporary design and the variety of sizes that adapt well for ADA signage. We can offer our customers a nice sign that can be customized to uniquely fit our client's request. We also appreciate the prompt and accurate response we receive from Arris when ordering.

OVERHEAD & PROJECTION

Overhead – Wall Mount (OWM)

Overhead wall-mount signs are 7/16" depth Arris System Horizontal Configuration frames. Radius profiles are at the top/bottom of sign. Concealed mechanical fastening secures the sign to the wall surface.

The 1/16" non-glare lens is lifted & pulled from the frame using a suction cup tool, making graphics easy to update.

Overhead – Ceiling Mount (OCM)

Arris overhead ceiling-mount signs feature a modular aluminum mounting bracket that can either be flush mounted to a ceiling surface or is easily compatible with cable suspension. Bracket installation is fast and easy. The 1/16" non-glare lenses are lifted and pulled from the frame with a suction cup tool.

Features (2) 7/16" depth Arris frames assembled back-to-back.

Wall - Projection Mount (PM)

Arris System wall projection assemblies feature two frames attached to a modular mounting bracket allowing for an easy yet very secure installation. .060" non-glare lenses are removed from the frames with a suction cup tool.

Features (2) 7/16" depth Arris frames assembled back-to-back.

FREESTANDING SIGNS

Stanchion (FSS)

The Arris System FSS Stanchion is the ideal solution for temporary displays or when displays, notices or messages need to be easily moved within a facility based upon traffic flow or schedule of events.

The FSS stanchion features a 1-1/2" diameter x 42"h extruded aluminum 2-piece pole assembly with a 12" diameter powder coated steel base plate for stability. Displays can be single or double-sided.

Kiosk (AK)

Free-standing kiosks can often be the perfect sign solution when architectural elements or traffic flow conditions are not suitable for traditionally mounted wall signage. The Arris AK Kiosk features uniquely designed 1.75" thick aluminum edge profiles, a durable steel base and removable 1/8" thick non-glare lenses, ideal for housing digitally printed signage & wayfinding graphics, advertising displays and more.

Kiosk Assembly AK

An 1/8" thick non-glare lens and subsurface graphic display locks within aluminum edge profiles. The lens is removed with a suction cup tool by sliding right and then pulling outward.

courier™ *Message & Display Strip*
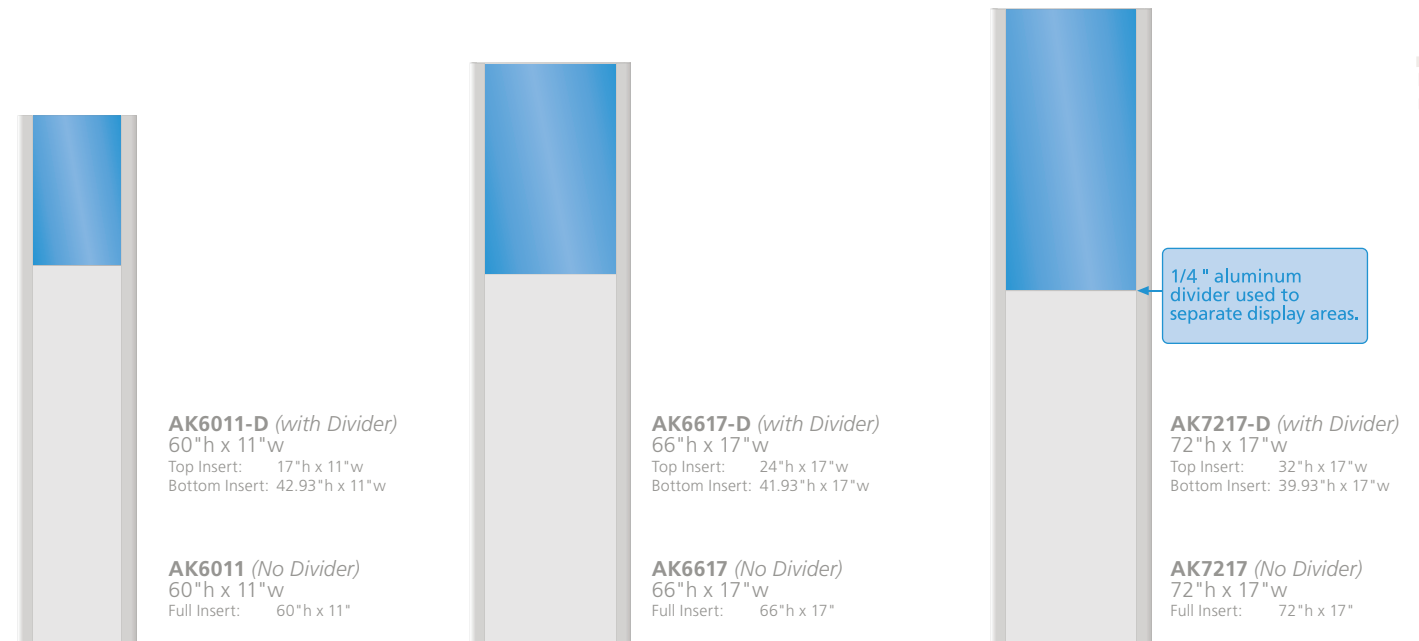

The Courier Message & Display Strip is an easy yet effective way to display notes, messages & displays, either as a stand alone product or combined with a sign from the Arris system. Once installed, simply insert a note or display into the Courier profile and it grips it automatically. It's that easy! To release, slide the note left or right.

The Courier Aluminum extrusion is a sleek 7/16" thick & features the same stylish radius shape as the Arris frame.

"Arris Signs was the perfect solution for our interior signage project! Our client was a church that wanted room number signs that could be changed with staff offices and event room location needs! So the Arris product was a perfect solution to create a wall sign that went with their branding but gave them great flexibility! With the addition of the wood accents it really took the interior signs to the next level and provided an upgraded stylish touch!"

SAMPLE KITS

Travel Sample Kit
The Arris Travel Sample Kit (shown right) is designed to be easily transported in our sleek and stylish canvas messenger bag. The kit consists of two display boards with three Arris samples and one Courier Message Strip sample. Board One contains a 9" x 8" Mini-Directory Wall Sign with one 2" x 8" header and four 1.5" x 8" inserts. Board Two contains one 2.5" x 8.5" Personnel Sign, one 6" x 6" Wall Sign, and one 4" Courier Message Strip.

Starter Kit (Not Shown)
Includes one 4" x 4" sample, one suction cup tool, one Courier sample, and ten Arris Brochures.

Arris Brochures are also available in packs of 50.

For Sample Kit pricing and ordering, please contact us at 888-744-6731 or by email at sales@arrissigns.com

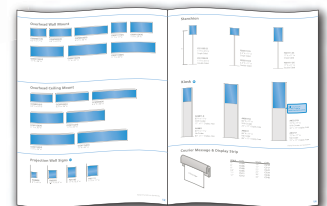

MARKET SOLUTIONS

Healthcare, Education and Corporate Sign Solutions Brochures
Valuable as both an idea gallery and as sales tools, these downloadable brochures help illustrate how the Arris system can be used within three of the most common types of facilities needing modular signs: healthcare, education and corporate.

Understanding signs can be complicated, especially for end users, so seeing them in action within a particular environment can help connect the dots. The Arris market solutions brochures are perfect for this!

You'll find Presentation Drawings for the Arris Sign System at: arrissigns.com/drawings.asp

Drawings are in Adobe Illustrator CS5 and CS4 (.ai) formats.

"As an authorized dealer of Arris signage products, we couldn't be happier with their quality. Arris' customer service is helpful and efficient. Our customers rely on the consistency of repeat orders and are never disappointed.
