The Components

Courier features a high quality 7/16" thick extruded aluminum profile with a durable satin anodized finish. Displays are automatically held in place by machined aluminum grip rods that are housed within the profile.

How It Works

INSTALLING to Wall

Peel liner from the high-bond adhesive on the back of the extrusion, level & install on any smooth wall surface.*

* Reference Arris Standard Assembly Instruction Sheet (AIS100) for important information regarding vinyl tape mounting.

INSERTING Paper

Insert any non-laminated paper display (up to 1/64" thick) into the extruded profile. The internal aluminum rollers automatically grip the display into place.

REMOVING Paper

Use two hands to gently slide the display from side to side. The paper will then release and can be pulled from the extrusion. (Do Not Pull Straight Down.)

Courier Sizes & Codes

Courier is offered in 12 different standard sizes, but custom widths are also available.

The following widths are available for **NEXT DAY SHIPPING**:

4", 6", 8.5", 11"

Width	Code	Width	Code
4"	CS-04	14"	CS-14
6"	CS-06	17"	CS-17
8"	CS-08	22"	CS-22
8.5"	CS-85	24"	CS-24
11"	CS-11	36"	CS-36
12"	CS-12	48"	CS-48
